

# **SUTHERLAND SHIRE MUSEUM**

## **Guides' Book**

Information contained in this Guides' Book is additional to that written on the labels with the Museum Objects and Images.

There are stories in this Guide which add context and interest to the necessarily brief descriptions on the labels. It also contains references and sources of information.

Not all items displayed in the Museum will have extra information included in this Guide. It is only used when relevant information and stories cannot be included on the labels.

The Guide is meant to be used as a source of further information as the need arises. You do not have to read and remember everything it contains.

If you have an interest in a particular object or image you may want to read up on it in the Guide and use that extra information while taking visitors around. Or visitors may ask for information that you don't have on an item, and you know you only have to refer to the Guide.

The List of Contents will help you navigate your way through the Guide to find what you are looking for. A copy of the label itself is reproduced for each item or theme before the extra information. This is to help you identify the information you are looking for.

Like the Museum display itself, this Guide is a work in progress. As more items are displayed, more information will be included in the Guide.

There will be two printed copies of the Guide kept at the Museum for your use when on duty.

# Guides' Book
