

SSHS BULLETIN INDEXES 1 (Sowden), 2 (Kavanagh) and 3 (Craig)

How to use the Indexes

All *SSHS Bulletins* have now been digitised and posted to this website, and they are searchable by keywords. Keyword searchable Indexes have also been created to direct you to the *Bulletin* edition you want.

Index 1 created by Ray Sowden in 1985 for all *Bulletins* from 1966 to that date, was done before digitisation, so keywords were organised in alphabetical order as in a book index.

Index 2 created by Merle Kavanagh in 2006 for all *Bulletins* from 1986 to 2006 were also created for print only, and keywords are similarly organised in alphabetical order.

Index 3 created by Elizabeth Craig cover all *Bulletins* from February 2007, and were prepared for digital keyword searches. There was therefore no need to alphabetize the keywords. Instead, a list of article titles, their authors and page numbers are listed in date order of the *Bulletins*, and in the right-hand column, a list of searchable keywords have been added which may not be reflected in the title. You then open the particular *Bulletin* that the keyword search on the Index directs you to and do a keyword search.

Index 3 will be updated with each new edition of the *Bulletin*. If you find errors in this index it would be appreciated if you alert Elizabeth Craig on elizabeth.craig@y7mail.com so that she can make any corrections at the next update.

Searching

To search the Indexes and individual *Bulletins*, download the PDF, right click and press 'Find'. Then put your keyword in the 'Find' box.
